INDEX

Page

Agriculture, diminishing returns, law. P. E. McNall 167–178
Alfalfa—
  cutting, frequency, effect on—
    development of dwarf disease 360–363, 367
    longevity of stand 358–360
  digestible nutrients, experiments 931–932
  dwarf disease—
    effect of environmental and cultural factors on. J. L. Weimer 351–368
    factors affecting 351–367
  hay—
    chemical composition 924–926
    curing, relation to nutritive value, experiments 919–942
  leaves—
    and stems, protein content, biological value 935–938, 942
    nutritive value. Jerry Sotola 919–945
  meal, digestibility, true and apparent, by swine, with special reference to digestibility of cellulose and crude fiber. H. H. Mitchell and T. S. Hamilton 425–435
  rations—
    apparent digestibility, coefficients of 928–931
    feeding to lambs, experiments 919–942
  stems, nutritive value. Jerry Sotola 919–945
ALLEN, RUTH F.: Further Cytological Studies of Heterothallism in *Puccinia graminis* 1–16
Ammonia—
  effect on—
    germination of cotton root-rot sclerotia 110–112
    growth of *Phymatotrichum omnivorum* mycelium 110
    mycelium in infected cotton roots 112–113
  toxic effect on cotton root-rot fungus growing in synthetic media. David C. Neal, R. E. Wester, and Kenneth C. Gunn 107–118
Ammonium—
  hydroxide, effect on—
    cotton plants, tests 114
    growth of *Phymatotrichum omnivorum* mycelium 110
  sulphate, lysimeter experiments. T. L. Lyon and J. A. Bizzell 53–63
ANDERSON, MELVIN E.: *Fusarium* Resistance in Wisconsin Hollander Cabbage 639–661
Andropogon scoparius, phosphorus content due to application of fertilizers to soil 911–916
Anemia—
  nutritional—
    in cattle, relation to composition of feedstuffs. W. M. Neal and R. B. Becker 249–255
    in suckling pigs, prevention studies 543–561
    prevention in suckling pigs, with observations on the blood picture. T. S. Hamilton, G. E. Hunt, and W. E. Carroll 543–563
Animal muscle tissue, effect of salt extraction on, studies 1009–1014
Aphid transmission of cucumber-mosaic virus to tobacco, factors involved. Ismé A. Hoggan 689–704
Apparatus, use in determination of areas of compound leaves. Roy E. Marshall 437–439
Apple—
  Gallia Beauty, self- and cross-pollination studies 526–527, 529, 532–533
  injury by petroleum-oil sprays. Paul A. Young and H. E. Morris 505–522
  leaves, injury by petroleum-oil sprays, experiments 509–515
  Rome Beauty, self- and cross-pollination studies 524–526, 527–529, 532–533

Apple—Continued. Page
  trees—
    fertilizer treatments, assimilation, studies 565–579
    growing in cylinders and subjected to differential treatment with nutrient salts; absorption, utilization, and recovery of nitrogen, phosphorus, and potassium by. Walter Thomas 565–581
  varieties—
    fruitfulness, pollination studies 523–536
    Rome Beauty and Gallia Beauty, self- and cross-pollination studies. Freeman S. Howlett 523–537
ARMSTRONG, G. M., and BENNETT, C. C.—
  Effect of Soil Fertility, Boll-Maturation Period, and Early or Late Production of Bolls on the Length of Cotton Fibers. 467–474
  Some Factors Influencing the Variability in Length of Cotton Fibers on Individual Plants as Shown by the Sorter Method 447–466
ARTSCHWAGER, ERNST, and STARRETT, RUTH COLVIN—
  Suberization and Wound-Cork Formation in the Sugar Beet as Affected by Temperature and Relative Humidity 669–674
  The Time Factor in Fertilization and Embryo Development in the Sugar Beet 823–843

BAKER, H. N.; MCPHEE, HUGH C.; and HOWE, PAUL E.: Some Details of Muscle Structure Revealed by Salt Extraction 1009–1014
Barberry leaf, infection by *Puccinia graminis*, cytological study 1–14
Barley, vitamin A content. E. H. Hughes 487–494
BEADLES, JESSIE R.; QUISENBERRY, J. H.; NAKAMURA, F. I.; and MITCHELL, H. H.: Effect of the Ripening Process of Cheese on the Nutritive Value of the Protein of Milk Curd 947–965
BEAUMONT, A. B.; EISENMENGER, W. S.; and MOORE, W. J., Jr.: Assimilation of Fixed Nitrogen by Grasses and Clovers 495–503
BECKER, R. B., and NEAL, W. M.:
  A Type of Laboratory Silo and Its Use with *Crotalaria* 617–625
  The Composition of Feedstuffs in Relation to Nutritional Anemia in Cattle 249–255
BECKWITH, C. S., and WILCOX, R. B.: A Factor in the Varietal Resistance of Cranberries to the False-Blossom Disease 583–590
Beef, muscle tissue, structure study 1009–1014
BENNETT, C. C., and ARMSTRONG, G. M.:
  Effect of Soil Fertility, Boll-Maturation Period, and Early or Late Production of Bolls on the Length of Cotton Fibers. 467–474
  Some Factors Influencing the Variability in Length of Cotton Fibers on Individual Plants as Shown by the Sorter Method 447–466
BERTHOLF, LLOYD M.: Some Physiological Effects of Ultra-violet Radiation on Honeybees 375–378
Beta vulgaris. *See* Sugar beet.
BETHKE, R. M.; EDGINGTON, B. H.; and KICK, C. H.: Effect of the Calcium-Phosphorus Relationship of the Ration on Growth and Bone Formation in the Pig. 331–338
BIZZELL, J. A., and LYON, T. L.: Lysimeter Experiments with Sulphate of Ammonia and Nitrate of Soda 53–63
Blackberries, cytology and breeding. George M. Darrow and A. E. Longley 315–330
Blackberry, Logan, cytology and breeding 320–328
Blister rust, damage to northern white pine at Waterford, Vt. E. C. Filler 297–313

Blood, of anemic suckling pigs, hemoglobin concentration observations ... 546–561
Blueberries, vitamins C and A in. C. R. Fellers and P. D. Isham ... 163–165
Bone—
calcification, in pigs, effect of calcium-phosphorus ratio in rations ... 332–335
formation and growth in pigs, effect of the calcium-phosphorus relationship of the ration on. R. M. Bethke, B. H. Edgington, and C. H. Kick ... 331–338
Brassica oleracea, var. *capitata*. *See* Cabbage.
BRATZLER, JOHN W., and SHREWSBURY, CHARLES L.: Cystine Deficiency of Soybean Protein at Various Levels, in a Purified Ration and as a Supplement to Corn ... 889–895
BROWN, LLOYD N.: Flooding to Control Root-Knot Nematodes ... 883–888
BRUNER, S. C., and JENKINS, ANNA E.: Identity and Host Relations of the *Elsinoe* of Lima Bean ... 783–789
Bunt—
fungi—
forms, relation to varietal distribution of wheat ... 198–200
physiologic forms—
cultural studies ... 202–210
pathogenicity studies ... 196–212
prevalence and distribution in Pacific Northwest ... 195–196, 210–212
reaction, inheritance in Hope wheat crosses, experiments ... 90–104
See also *Tilletia levis; Tilletia tritici*.
Buttermilk, effect on whipping properties of ice-cream mixes ... 974–975

Cabbage—
age, relation to resistance to *Fusarium* ... 652–654
anther and embryo sac, development ... 219–225, 231
color—
development, histology ... 237
types, source and description ... 235–236
embryo, development, description ... 225–228
flower—
development, morphological study. Ross C. Thompson ... 215–232
primordia, differentiation ... 217–219, 231
growing, studies ... 215–232
inheritance of plant colors. Roy Magruder and C. H. Myers ... 233–248
plant colors in, inheritance. Roy Magruder and C. H. Myers ... 233–248
progenies, color development, experimental data ... 237–247
seed development, morphological study. Ross C. Thompson ... 215–232
Wisconsin Hollander, *Fusarium* resistance in. Melvin E. Anderson ... 639–661
yellows, resistance in Wisconsin Hollander variety ... 639–661
Cacoecia argyrospila, control by petroleum-oil sprays, experiments ... 505–520
Calcium—
balances of lambs, studies ... 938–941, 942
phosphorus relationship of ration, effect on growth and bone formation in the pig. R. M. Bethke, B. H. Edgington, and C. H. Kick ... 331–338
California, barley grown in, vitamin A content, study ... 487–494
Canna—
roots, storage of, effect upon electrolytes of extracted starches ... 183–185
sap, electrolytes of, variation, effect upon starch content ... 187–190
Capsicum annuum, inoculation with rugose mosaic, experiments ... 27
Carbon dioxide—
effect on germination of sporangia of, *Physoderma zeae-maydis*, tests ... 613
excess, effect on growing mushrooms. Edmund B. Lambert ... 599–608
CARROLL, W. E.; HAMILTON, T. S.; and HUNT, G. E.: The Prevention of Anemia in Suckling Pigs, with Observations on the Blood Picture ... 543–563

Ceratostomella pilifera, control by steam sterilization of wood ... 370–373, 374
CHAPMAN, A. DALE: Effect of Steam Sterilization on Susceptibility of Wood to Blue-Staining and Wood-Destroying Fungi ... 369–374
Cheese—
Cheddar, ripening, effect on nutritive value, experiments ... 947–951, 963
fresh, chemical composition ... 948
Limburger, ripening, effect on nutritive value, experiments ... 947–952, 956–959, 962–964
protein, growth-promoting value, studies ... 949–951
ripening process, effect on nutritive value of protein of milk curd. Jessie R. Beadles, J. H. Quisenberry, F. I. Nakamura, and H. H. Mitchell ... 947–965
Roquefort, ripening, effect on nutritive value, experiments ... 947–952, 963–964
Swiss, ripening, effect on nutritive value, experiments ... 947–956, 963–964
Chickens—
metabolism, data for planning ventilation of houses for ... 735–747
Single Comb Rhode Island Red, plumage and eye color, inheritance studies ... 897–910
Chromosomes—
doubling in haploint *Nicotiana glutinosa* ... 853–854
morphology in *Nicotiana glutinosa* ... 849–851
Clovers, assimilation of fixed nitrogen. A. B. Beaumont, W. S. Eisenmenger, and W. J. Moore, Jr. ... 495–503
COLE, J. R.: Liver-Spot Disease of Pecan Foliage Caused by *Gnomonia caryae pecanae*, nov. var. ... 869–881
Colors, plant, in cabbage, inheritance. Roy Magruder and C. H. Myers ... 233–248
Conifer seeds, distribution and rate of fall. Howard W. Siggers ... 119–128
Containers, linings injurious to pears, investigations ... 153–162
Corn—
acre yield and plant variability, effect of stand irregularities upon. T. A. Kiesselbach and Ralph M. Weihing ... 399–416
ear, height, variability ... 408–409
mineral content, effect on salt-sick cattle ... 250, 252, 254
nutritive value for rats, comparison with soybeans, experiments ... 890–890, 891, 893–895
plant—
height, variability ... 406–408
infection by *Physoderma zeae-maydis*, studies ... 609–615
variability and acre yield, effect of stand irregularities upon. T. A. Kiesselbach and Ralph M. Weihing ... 399–416
rootworm, transmission of Stewart's wilt disease, experiments ... 762
stands—
actual *v.* theoretical from imperfectly germinating seed, study ... 402–403
irregularities, effects upon acre yield and plant variability. T. A. Kiesselbach and Ralph M. Weihing ... 399–416
kinds, comparison ... 399–400
variability, comparison ... 400–402
Stewart's wilt disease—
symptoms, description ... 751–755, 768
with emphasis on the life history of *Phytomonas stewarti* in relation to pathogenesis. S. S. Ivanoff ... 749–770
uneven stands, effect upon the yield of grain, data ... 403–405, 411–412

Corn—Continued.
vitamin A content, comparison with barley, experiments 487–494
Cornstalks, diameter, variations 409–410
Cotton—
boll-maturation period, effect on length of fiber 471–472
bolls—
age, effect on length of fiber 469–471
first and second crops, relative length of fiber 472–473
fibers—
length, effect of soil fertility, boll-maturation period, and early or late production of bolls. G. M. Armstrong and C. C. Bennett 467–474
length, variability on individual plants, factors influencing, as shown by the sorter method. G. M. Armstrong and C. C. Bennett 447–466
number and weight on immature bolls, determination 460–464
time of origin, relation to variations in lint length 456–464
halo length, measurement 459
irrigation and plant spacing, effects on number of locks in bolls. A. R. Leding and L. R. Lytton 33–52
lint length—
variability on individual plants, factors 448–456
variations, relation to probable time of origin of fibers 456–464
lock number, relation to plant spacing and irrigation. A. R. Leding and L. R. Lytton 33–53
plant spacing and irrigation, effects on number of locks in bolls. A. R. Leding and L. R. Lytton 33–52
root-rot fungus, growth in synthetic media, and toxic effect of ammonia on. David C. Neal, R. E. Wester, and Kenneth C. Gunn 107–118
seed growth, determination 458–459
Cows, dairy, grazing habits, influence of pasture management upon 417–424
Cranberries, varietal resistance to false-blossom disease, factor. L. B. Wilcox and C. S. Beckwith 583–590
Cronartium ribicola—
aeciospores, production time required 800–803, 804
damage to northern white pine, study in Vermont 297–313
incubation period, studies 793–800, 804
mode of entrance and periods in the life cycle of, on *Pinus monticola*. H. G. Lachmund 791–805
periods in life cycle of and modes of entrance on *Pinus monticola*. H. G. Lachmund 791–805
Crops, yield, study by application of law of diminishing returns 167–177
Crossbreeding, cabbage, for inheritance of color 234, 237–247
Crotalaria, silo for, laboratory experiments. W. M. Neal and R. B. Becker 617–625
Cucumber-mosaic virus, transmission by aphids to tobacco, factors involved. Ismé A. Hoggan 689–704
CULPEPPER, C. W., and MOON, H. H.: Composition of Eggplant Fruit at Different Stages of Maturity in Relation to Its Preparation and Use as Food 705–717
Cystine deficiency, soybean protein at various levels in a purified ration and as corn supplement. Charles L. Shrewsbury and John W. Bratzler 889–895

fixed, assimilation by grasses and clovers. A. B. Beaumont, W. S. Eisenmenger, and W. J. Moore, Jr 1009–1014
losses from drainage water, experiments with lysimeter tanks 495–503
metabolism—
of lambs fed on alfalfa rations, studies 53–62
Nitrogen—Continued. Page
metabolism—continued.
of rats fed on milk-curd and cheese rations, experiments 932–935, 942
Nutritional anemia in cattle, relation to composition of feedstuffs. W. M. Neal and R. B. Becker 953–954, 963
Nutritive value of alfalfa leaves and stems. Jerry Sotola 249–255

Oat hulls, digestibility—
by different species of livestock, comparisons 919–945
true and apparent, by swine, with special reference to digestibility of cellulose and crude fiber. H. H. Mitchell and T. S. Hamilton 431–432
Oils, lubricating, use in sprays, injury to apple 425–435
Oklahoma, central, soils treated with superphosphate, phosphorus content of prairie grasses growing on. H. F. Murphy 505–520
Oryza sativa. *See* Rice.
Oxygen, effect on germination of *Physoderma zeae-maydis* sporangia 911–917

Paper liners, impregnation with sodium silicate, cause of injury to pears. D. H. Rose and J. M. Lutz 612
PARSONS, HELEN T., and HORN, CAROLYN: The Vitamin C Content of Commercially Canned Sauerkraut Produced under Known Conditions 153–162
Pasture management, influence upon grazing habits of dairy cattle. R. E. Hodgson 627–638
Pea—
varieties, susceptibility to wilt disease, tests 417–424
wilt—
Fusarium, physiology, studies 67–71
Fusarium, strains, pathogenicity 77–84
organism, *Fusarium orthoceras* var. *pisi*, variability. William C. Snyder 65–77, 85
Peach aphid, green, transmission of cucumber-mosaic virus to tobacco 65–88
Pears, injury by paper liners impregnated with sodium silicate. D. H. Rose and J. M. Lutz 689–703
Pecan—
foliage, liver-spot disease caused by *Gnomonia caryae pecanae*, nov. var. J. R. Cole 153–162
leaf, liver-spot disease—
control experiments 869–881
description and cause 880
distribution and economic importance 869–880
pollination, control methods. Hamilton P. Traub and L. D. Romberg 869
varietal susceptibility to liver-spot fungus 287–296
Pectin, content of eggplant, investigations 880
Petroleum-oil sprays, injury to apple. Paul A. Young and H. E. Morris 713–715
Petunia, inoculation with rugose mosaic, experiments 505–522
Phosphorus—
absorption, utilization, and recovery of, by apple trees grown in cylinders and subjected to differential treatment with nutrient salts. Walter Thomas 28
balances of lambs, studies 565–581
calcium relationship of ration, effect on growth and bone formation in the pig. R. M. Bethke, B. H. Edgington, and C. H. Kick 938–941, 942
recovery from prairie grasses growing on central Oklahoma soils treated with superphosphate. H. F. Murphy 331–338
Phymatotrichum omnivorum—
growth in synthetic media, and toxic effect of ammonia on 911–917
mycelium, growth effect of ammonia compounds 107–118
sclerotia, germination, effect of ammonia 110
Physalis sp., inoculation with rugose-mosaic virus 110–112
25–26

Page

Physoderma zeae-maydis, sporangia of, germination, effect of environmental factors on. R. K. Voorhees 609–615
Phytomonas stewarti—
isolation from soil, development of medium for 763–768
life history of in relation to pathogenesis and Stewart's wilt disease of corn. S. S. Ivanoff 749–770
Pig—
bone formation and growth, effect of calcium-phosphorus relationship of the ration. R. M. Bethke, B. H. Edgington, and C. H. Kick 331–338
growth and bone formation, effect of calcium-phosphorus relationship of the ration. R. M. Bethke, B. H. Edgington, and C. H. Kick 331–338
Pigs—
blood composition, effect of varying phosphorus and calcium intake 336–337
bone calcification, effect of calcium-phosphorus ratio in ration 332–335
digestion of oat hulls and crude fiber, studies 425–434
feed utilization, effect of varying phosphorus and calcium intake 336–337
suckling, anemia-prevention studies, with observation on the blood picture. T. S. Hamilton, G. E. Hunt, and W. E. Carroll 543–563
vitamin D requirement, relation to calcium and phosphorus content of ration 335–337, 338
See also Swine.
Pine—
northern white, blister rust damage at Waterford, Vt. E. C. Filler 297–313
seeds, distribution and rate of fall, studies 119–127
shortleaf, board-foot volume equation, alinement chart 734
southern, sterilization for immunity from fungi, experiments 369–374
Pines—
infection by *Cronartium ribicola*, studies 791–804
loblolly, growth increase after partial cutting. A. L. MacKinney 807–821
white, merchantable stand, damage by blister rust 303–313
Pinus monticola, *Cronartium ribicola* on, mode of entrance and periods in the life cycle of. H. G. Lachmund 791–805
Plant—
colors in cabbage, inheritance. Roy Magruder and C. H. Myers 233–248
growth, study by application of law of diminishing returns 167–177
tissue, feeding punctures produced by potato leaf hopper and three-cornered alfalfa hopper, nature of sheath material in 475–484
POLHAMUS, LOREN G.: Rubber Content of Various Species of Goldenrod 149–152
Pollen—
sugar-beet, description and germination 828–831, 842–843
tube, sugar-beet, growth 831–832
Pollination—
apple varieties, particularly Rome Beauty and Gallia Beauty, studies. Freeman S. Howlett 523–537
control in pecan, methods. Hamilton P. Traub and L. D. Romberg 287–296
Poplar, yellow, timber volume, logarithmic expression 731–733
Poria incrassata, control by steam treatments, experiments 373–374
Potassium, absorption, utilization, and recovery of, by apple trees grown in cylinders and subjected to differential treatment with nutrient salts. Walter Thomas 565–581
Potato—
leaf roll and rugose mosaic, possible conveyance by weeds. T. P. Dykstra 17–32
rugose mosaic and leaf roll, possible conveyance by weeds. T. P. Dykstra 17–32

Page

Potatoes, storage of, effect upon electrolytes of extracted starches 183–185
Poultry—
carriers of pullorum disease, studies 441–445
houses, ventilation of, estimated data on the energy, gaseous, and water metabolism of poultry for use in planning. H. H. Mitchell and M. A. R. Kelley 735–748
nutritive requirements, heat production and water metabolism 740–747
Single Comb Rhode Island Red, plumage and eye color, inheritance studies 897–910
Protein—
cheese and milk-curd, comparative digestibility 952
content, wheat, relation to temperature and moisture conditions, experiments 129–146
of milk curd, nutritive value, effect of ripening process of cheese on. Jessie R. Beadles, J. H. Quisenberry, F. I. Nakamura, and H. H. Mitchell 947–965
soybean, cystine deficiency at various levels in a purified ration and as a supplement to corn. Charles L. Shrewsbury and John W. Bratzler 889–895
Proteins, soluble, removal from muscle, effect on structure 1009–1014
Puccinia graminis—
heterothallism in, further cytological studies. Ruth F. Allen 1–16
hyphae, microscopic studies 1–14
Pullorum disease—
adult carriers of, recovery of *Salmonella pullorum* from the feces of. R. E. Greaves, R. S. Dearstyne, and H. C. Gauger 441–445
communication by feces, experiments 441–445

relations of wood-destroying fungi. C. J. Humphrey and P. V. Siggers 997–1008
Texas pecans, pollination, control methods 287–296
THOMAS, WALTER: Absorption, Utilization, and Recovery of Nitrogen, Phosphorus, and Potassium by Apple Trees Grown in Cylinders and Subjected to Differential Treatment with Nutrient Salts 565–581
THOMPSON, ROSS C.: A Morphological Study of Flower and Seed Development in Cabbage 215–232
Tilletia—
levis, physiologic—
forms, inheritance of reaction to in wheat. William K. Smith 89–105
specialization, studies in the Pacific Northwest. H. H. Flor 193–213
spp. *See* Bunt fungi.
tritici—
and *T. levis*, physiological specialization studies. H. H. Flor 193–213
physiologic forms, inheritance of reaction to in wheat. William K. Smith. 89–105
physiologic specialization, studies in the Pacific Northwest. H. H. Flor 193–213

Timber— Page
decay, fungi causing—
list, with sources and localities 999
temperature relations 997–1008
volume, logarithmic expression. Francis X. Schumacher and Francisco dos Santos Hall 719–734
Tobacco, aphid transmission of cucumber-mosaic virus to, factors involved. Ismé A. Hoggan 689–704
Tomato, inoculation with—
leaf roll, experiments 25
rugose mosaic, experiments 24–25
TRAUB, HAMILTON P., and ROMBERG, L. D.: Methods of Controlling Pollination in the Pecan 287–296
Tree—
forest—
growth increase after partial cutting, study 807–820
seeds, distribution and rate of fall, studies 119–127
timber, volume, logarithmic expression. Francis X. Schumacher and Francisco dos Santos Hall 719–734
TREICHLER, RAY, and FRAPS, G. S.: Losses of Vitamin A in Drying Fresh Raw Carrots and Sweetpotatoes and Canned Spinach 539–541
TULLIS, E. C.: *Leptosphaeria salvinii*, the Ascigerous Stage of *Helminthosporium sigmoideum* and *Sclerotium oryzae* 675–687
Turkeys, metabolism data for planning ventilation of houses 735–747

Ultraviolet radiation on honeybees, some physiological effects. Lloyd M. Bertholf. 375–398

Vaccinium macrocarpon, varietal resistance to false-blossom disease, factor 583–589
Vegetables, drying, losses of vitamin A 539–541
Velvetbeans, feeding to cattle in study of salt sick 250–254
Ventilation—
mushroom culture, experiments 599–608
poultry houses, estimated data on energy, gaseous, and water metabolism of poultry for use in planning. H. H. Mitchell and M. A. R. Kelley 735–748
Vermont, Waterford, blister rust damage to northern white pine. E. C. Filler 297–313
Vitamin—
A—
content of barley. E. H. Hughes 487–494
in blueberries. C. R. Fellers and P. D. Isham 163–165
losses in drying fresh raw carrots and sweetpotatoes and canned spinach. G. S. Fraps and Ray Treichler 539–541
C—
content of commercially canned sauerkraut produced under known conditions. Helen T. Parsons and Carolyn Horn 627–638
in blueberries. C. R. Fellers and P. D. Isham 163–165
VOORHEES, R. K.: Effect of Certain Environmental Factors on the Germination of the Sporangia of *Physoderma zeae-maydis* 609–615

WALDRON, L. R.: Yield and Protein Content of Hard Red Spring Wheat under Conditions of High Temperature and Low Moisture 129–147
WALTS, C. C., and DAHLE, C. D.: The Effect of Egg Products on the Whipping Properties of Ice-Cream Mixes Made from Butter and Dried Skim Milk 967–977
WARREN, D. C., and GORDON, C. D.: Plumage and Eye Color Inheritance in the Single Comb Rhode Island Red Fowl 897–910
Water, drainage, nitrogen losses, experiments with lysimeter tanks 53–62
Weather, relation to petroleum-oil injuries to apple 517–518
WEBBER, JOHN MILTON: Cytological Features of *Nicotiana glutinosa* Haploints 845–867
